Fire Response

Innovative Solutions Specialist

Fire Response is Australia's leading Fire, Safety and Rescue equipment wholesaler and supplier.

Fire Response is Australia's leading Fire, Safety and Rescue equipment wholesaler and supplier. We represent a portfolio of world leading manufacturers such as: Akron Brass, AWG, VS Focum, One Seven CAFS, FLIR, Red Head Brass, Streamlight, Luitpold Schott, Super Vac and Phoenix pumps. Supplying fire equipment & fittings, PPV, ventilators, hand torches, scene lighting (both portable and fixed), thermal imaging cameras, superior firefighting foam, fire nozzles, fire monitors, watercart water cannons, foam equipment, hand rescue tools, portable water dams, hydrant flow test equipment, hose reels, fire hoses, storz fittings, BI fittings, portable firefighting pumps and more.

We are proud suppliers to Government & Industry, Mining, Defence and Fire companies. When Quality counts you can rely on Fire Response Pty Ltd. We are conveniently located in Lake Macquarie, NSW, distributing across Australia and Oceania. Our business supplies products to Fire and Emergency Services across Australia. Other industries we service include Mining, Petro-Chemical, Oil/Gas, Defence, Police, Ambulance, SES, Trades, Retail, Security, Airports, OEM's, Resellers etc. We offer equipment, flow and foam testing as well as presentations on transitioning your worksite to fluorine free foam. With many years experience in the Fire/Safety industry, Fire Response aims to deliver the highest level of product and service quality and total customer satisfaction. Our Customer Services team is always willing to assist you with your enquiries, process your order and provide you with the service and advice you require.

If you would like further information on our product range or would like an equipment demonstration, please contact our Sales team who will be happy to assist you on (02) 4944 7700 or, alternatively you can email us at firemail@fireresponse.com.au

Fire Response Pty Ltd are proud to be awarded the quality standards AS/NZS ISO 9001, ISO14001 and ISO45001

Be prepared for what lies on the other side of the smoke...

FLIR K series thermal imaging cameras lead the way in TIC technology and innovation. These cameras are purpose built for use in all Emergency Services markets in Australia. FLIR manufacture rugged, compact thermal cameras that serve as an extra set of eyes on the fire scene. Designed with ease-of-use in mind, the FLIR K Series helps you see through smoke, locate hotspots, and save lives - all with gloved hands.

A high performance thermal imaging camera is indispensable – a vital tool that helps you quickly visualise your plan of attack, locate hot spots, and save lives. Ideally, every fire truck or fire appliance should have at least one high-performance TIC on hand and FLIR is the first choice of emergency crews all over the world. Contact us to today for more information or to organise a demonstration. Must be seen to be believed!

FIRE FIGHTING FOAM

VS Focum have been manufacturing foam since 2002. Their world-class quality research and development has them constantly on top of the evolution of firefighting foams. These foams are certified to relevant standards and offer real alternatives to commonly used foams. Markets utilising VS Focum foam are chemical plants, fire brigades, airports, defence, power stations, motor industry, mining, helicopters, forestry, fuel terminals, tug boats. Our firefighting foam range includes industry-leading Fluorine Free Foams (Newtonian and Pseudoplastic), AFFF, training foams, Class A foams, forest fire retardant, and multi-expansion foams.

We can have VS Focum labs analyse and performance test your foam in line with international standards and we offer a valuable on site equipment and flow testing service to ensure the performance and safety of your system.

Plan your foam transition with our help. Our VS Focum Fluorine Free Foams do not contain any fluorosurfactant, any fluoropolymer or any silicon whilst retaining the highest fire fighting response. We offer transition planning guidance and presentations on worksite requirements and considerations to help you avoid costly mistakes.

Akron Brass has been manufacturing firefighting nozzles since the early 1900s. Their equipment is trusted by firefighters the world over for their operational flexibility, stream performance, and flow control. They offer a variety of nozzle types, including straight stream, fog patterns, smooth bore, and adjustable gallonage.

The superior technology and performance of Akron Brass nozzles make them the best choice for firefighters.

FORESTRY FIRE EQUIPMENT

Sourced from internationally renowned manufacturers, the FRPL range of forestry equipment includes products from VS Focum and Akron Brass. We have the tools and equipment to suit all your forestry operational rural fire fighting requirements.

We supply high quality bushfire equipment including hand tools, nozzles, portable water storage and more. Have you considered a FLIR Thermal Imaging Camera - crucial for identifying hotspots during cleanup?

We understand how crucial it is for you to be equipped with the right firefighting gear and that's why we focus on quality, performance and reliability. Here's a sample of our range. If you don't see it here or on our website, contact us and we'll find it.

FRPL supplies a number of adaptors to suit fire appliances across Australia, from metropolitan, rural, defence, forestry, industrial, building to mining and watercarts.

EFFICIENT, PORTABLE, AND USER-FRIENDLY.

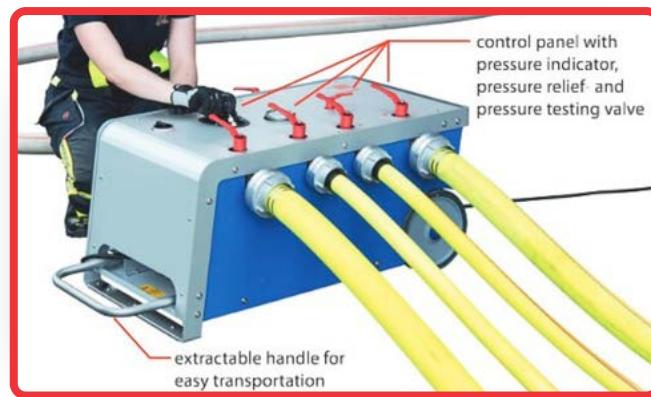

Test 4 hoses simultaneously!

The Barth P 2020 hose tester is a portable system designed for testing fire hoses in the field, ensuring they meet relevant industry standards without needing to be sent off-site. This tester can handle up to four hoses simultaneously, making it efficient for large-scale operations. The equipment is recognised for its quality German engineering and is suitable for various sectors including emergency services, mining, and industrial applications.

The pressure testing pump is seamlessly integrated into the BARTH P2020's chassis for user-friendly operation. With the advanced Piston Pump and stainless steel piping, achieve a maximum flow rate of 52 L/min and a testing pressure of up to 24 bar (~348 psi).

You can find more details and specifications on the Fire Response website, along with details of our other related firefighting equipment.

Our range of analogue and digital meters are suitable for use in testing fire hydrants to Australian Standards, flow testing fire monitors or watercart water cannons, and in fire training grounds. We have meters for testing backflow, sprinkler systems, hose reels and hydrants. We have an exclusive range of Australian made devices uniquely suited to Australian requirements.

At Fire Response, we are dedicated to assisting you to achieve the optimum performance from your equipment and so we have introduced a flow testing and hydraulics service. Contact us to find out how our Hydraulics and Flow Testing can help you to reach higher standards of safety and more efficient, effective use of your equipment.

PORTABLE FIRE PUMPS

Portable fire pumps with unrivalled power and uncompromising reliability. Our rugged firefighting pumps are lightweight and ready to be deployed in an instant, providing constant, effective flow when you need it!

We have carefully selected a range of pumps from Phoenix Fire Pumps, Blazemaster and Davey. We offer high performance portable fire pumps for both the fire industry and marine market. They can also be used for irrigation, washing down farm machinery and other jobs that need pressurised water.

Premium Quality Fire Extinguishers for home, office, vehicle, caravan, etc

Do you need to upgrade your old extinguisher or purchase your first one? We have a variety of alternatives determined by the class of fire you are likely to be confronted with including a Fluorine Free Foam fire extinguisher containing our superior Silvara | Newtonian foam.

With the right fire equipment at hand, you can often control a fire before it spreads and gets out of control. It is essential that Australian companies have the right type of fire extinguisher installed in their workplace for the class of fire likely to occur.

Note: It is illegal to have pre 1997 extinguishers

ABE Dry Certified & Approved AS/NZS 1841.5

Air Water Certified & approved to AS/NZS 1841.2

CO2 certified & approved to AS/NZS 1841.6

Fluorine Free Certified & Approved AS/NZS 1841.4

Wet Chemical Certified & Approved AS/NZS 1841.3

All of our extinguishers are high performance rated and approved to AS 1841. Various sizes are available to suit your needs. Constructed from materials that are highly resistant to corrosion - stainless steel handles, brass valves and light weight aluminium cylinders. Brass mounting brackets are included.

The Trident Tripod Light from Command Lighting comes in a 40 or 50 inch configuration. Designed to meet the rigorous demands of firefighting scenarios, this powerful lighting system ensures optimal visibility in critical situations. With cutting-edge features like the Akron Brass Revel Light and Milwaukee Rechargeable Battery, you can trust the Trident 40 inch Tripod Light to deliver reliable performance when it matters most.

Extendable to 1779mm (approx. 70"), the Trident Tripod Light is durable, portable and adaptable. Available with other light heads and battery platforms to seamlessly fit in with your other equipment. Message board option also available. Contact us for more.

Emergency services worldwide trust Alco monitors for their quality engineering, versatility and durability. They manufacture models suitable for stationary use or mobile deployment on vehicles, ships, and industrial plants.

Alco products are built to endure the toughest conditions. They are resistant to extreme stresses, including stone impacts, seawater, chemicals, and temperature fluctuations. Constructed from anodized or hard-anodized aluminum alloys and copper alloys, Alco monitors offer unparalleled resilience. A meticulous, high-quality lacquer coating adds an extra layer of durability.

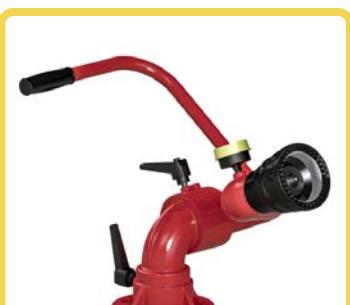

Alco monitors are the result of extensive practical experience and continuous technical innovation. They are designed to operate efficiently with water, foam, and/or powder, ensuring you have the right monitor for every application.

One Seven CAFS (Compressed Air Foam Systems) delivers high-performance fire suppression for emergency services, mining operations, industrial facilities, energy plants, and high-risk environments.

Engineered in Germany, One Seven systems combine compressed air with precisely dosed foam to produce a fine, stable mixture while using significantly less water and concentrate than conventional methods. The result is faster knockdown, reduced water damage, extended operating time from smaller tanks, and improved safety for firefighters, making One Seven CAFS a proven, efficient solution for Australian firefighting demands.

Fixed Systems - One Seven Fixed Systems offer powerful, automated fire protection for industrial facilities, warehouses, data centres, energy plants, etc. Fast, efficient fire suppression, minimising water consumption while maximising fire control.

One Seven Wall Hydrant

One Seven Maxi-Xtinguisher

One Seven Stored Energy System

Mobile Built-In Systems - One Seven Built-In Fire Suppression Systems deliver fully integrated vehicle solutions for fire services, mining, and heavy industry in Australia. Compact and powerful, they provide reliable firefighting performance for new builds or retrofit installations across specialist and industrial fleets.

One Seven Built-In System

One Seven Retrofit Systems

One Seven Mining System

One Seven's advanced CAFS technology is setting new standards in fire suppression efficiency, safety, & performance. As the trusted distributor in Australia, we look forward to providing industries and emergency services with cutting-edge firefighting solutions that make a real impact.

Proportioning Systems - Precise, reliable foam concentrate dosing for firefighting operations. For maximum accuracy, these systems automatically adjust to changing flow rates & pressures, ensuring consistent foam quality and optimised extinguishing performance.

One Seven fixed proportioners integrate seamlessly into new builds or retrofit on fire trucks, sprinkler systems, & industrial systems, while the portable proportioner offers location flexibility. By guaranteeing exact proportioning from 0.1% to 6%, they reduce concentrate consumption, cut operating costs, and improve environmental sustainability.

Portable Proportioning System

24i and 48i Proportioners

16i and 32i Proportioners

Self Contained CAFS - One Seven Self Contained Systems bring the power of compressed air foam technology into a compact, stand-alone unit that can be mounted on 4WDs, utes, trailers and light vehicles. These systems are designed for mobility, speed, and reliability, giving crews the ability to reach and control incidents quickly – even in remote or hard-to-access areas.
